SUMMARY

Results-driven MERN-Stack Developer with deep proficiency in Node.js, creating robust APIs, scalable systems, and user-focused interfaces following Agile and modern development standards.

EXPERIENCE

Junior Web Developer (On-site)   Aug 20, 2024 – Present
StackDot, Ahmedabad, Gujarat

- Engineered MERN-based web applications, boosting user experience and performance by 20%. Improved application responsiveness, load time, and overall usability across devices.
- Collaborated in Agile workflows, contributing to sprint planning, stand-ups, and code reviews.

Full Stack Web Development Intern (Remote)   Dec 2023 – Feb 2024
Edunet Foundation (AICTE)

- Completed a full-stack e-commerce project using Django during internship, which was selected in the top 30 and earned a Certificate of Merit for outstanding performance.

SKILLS

Problem Solving	DSA, System Design , Caching, Microservices, Authentication
Technical Skills	JavaScript, TypeScript, Python, Java, MySQL, MongoDB, HTML5, CSS3
Frameworks/Libraries	Next.js, LangChain, React.js, Express.js, mongoose
Tools	Git, Docker, AWS (basics), Linux
Soft Skills	Adaptability, Team Collaboration, Time Management, Risk Management

EDUCATION

bachelor of technology in Computer Science And Engineering   2021-2025
GITAM, Bhubaneswar, Odisha (CGPA: 8.67)

PROJECTS

1. Monoscrum — Ai Powered Task Management System
(React — Tanstack-query — Express.js — MongoDB)

- a high-performance MERN application leveraging TanStack Query and Redis caching, improving API response time and data efficiency by 35%.
- Implemented scalable task-management modules—including Kanban Scrum boards, rich-text editing, and collaboration tools—enhancing team productivity and workflow visibility by 25%.

2. 4Ever: E-Commerce Web Application
(Mern-Stack — Redis — Tailwind — Razorpay)

- Developed a MERN + Framer Motion e-commerce platform with product display, filtering, and full order flow, improving user navigation speed and interaction smoothness by 30%.
- Integrated secure payment gateway and return policy modules, enhancing checkout reliability and overall user satisfaction by 25%.
